

Abstract

Bachelor's thesis „Corporal punishment in upbringing - The comparative survey of boys and their parents“ deals with perception of corporal punishment by parents and children. The aim of this thesis is to discover if the number, sex of children or just personal experience of parents can influence corporal punishment. This thesis is divided into two parts- the theoretical one and the empirical one. In the theoretical part there are defined basic notion and presented principal researches on this topic. In the empirical part you can find my own qualitative research.
